CAREER OBJECTIVE

DBA candidate in Applied Artificial Intelligence (Belhaven University) with an operator's background in supply chain analytics, BI, and applied AI — ex-Amazon transportation analytics, RAG/LLM platforms, and data engineering at scale. Seeking to compete and build at AI hackathons and contribute to open, operator-led AI tooling, bringing production-hardened AI experience and an open-source bias-audit toolkit (*opsaudit*) to fast-moving teams.

PROFESSIONAL EXPERIENCE

Cortracker360 — AI Solutions & Data Analytics Consultant

Michigan | Jan 2025 – Aug 2026

- Architected a domain-grounded conversational AI platform (Python, FastAPI, NLP, embeddings, vector retrieval) enabling 24/7 multi-turn product discovery and workflow guidance.
- Lifted answer accuracy ~20%+ via retrieval-grounded workflows; evaluated 100+ query variations across semantic retrieval and response grounding.
- Operationalized dynamic knowledge sync and modularized multi-client AI delivery, streamlining onboarding across client projects.

JerseySTEM — People Analytics & BI Consultant

New Jersey | Mar 2024 – Dec 2024

- Operationalized workforce intelligence across ~9 teams and 90 volunteers: BigQuery activity data → Power BI and Looker Studio dashboards; standardized 10+ workforce and operational KPIs.

Amazon Development Center — Transportation Specialist, ROC | Network Optimization & Analytics

India | Nov 2020 – Jun 2022

- Recovered and redeployed 1,000+ idle trailers in 2 months using GPS telemetry, dwell, and capacity signals (Redshift, QuickSight).
- Compressed a daily 3PL workflow 87.5% (2 hours → 15 minutes) via Python/pandas automation; orchestrated real-time capacity balancing across North American nodes.

EDUCATION

- **Belhaven University** — Doctor of Business Administration (DBA), Applied Artificial Intelligence | Aug 2026 – Present (expected 2030)
- **University at Buffalo, SUNY** — Master of Science, Data Science Engineering | Sep 2022 – Jan 2024

PROJECTS

- **opsaudit** — open-source bias/disparity audit toolkit for operational decision systems (github.com/ram-polisetti/opsaudit); 36/36 tests passing, 95% coverage, Apache-2.0, CI on Python 3.10–3.12.

SKILLS

Applied AI: Generative AI, LLM applications, RAG, NLP, semantic/vector search, embeddings, model evaluation | **Data & Cloud:** Python, SQL, FastAPI, pandas, NumPy, PySpark, Redshift, BigQuery, Azure, GCP | **BI:** Power BI, DAX, QuickSight, Looker Studio, KPI reporting, dashboards | **Supply Chain:** transportation & logistics analytics, network optimization, capacity planning, 3PL analytics

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate • McKinsey Forward (Strategic Operations & Leadership) • Intro to Greenhouse Gas Accounting for IT (Cisco)
